41-803 Universal Ignitor**

## Features and Benefits

The new Robertshaw® Universal Ignitors are the perfect truck stock item so you always have the right ignitor. All universal ignitors replace over 130 ignitors currently found in the field. To allow for universal applications, mounting brackets and hardware are included. Robertshaw Universal Ignitors are recommended for operating voltage of 120V AC. We offer three models to fit your durability needs. The 41-802N is the best model available with the highest level of durability. The 41-801N offers medium durability and the 41-803 offers good durability.

### 41-802N

- The ultimate in Silicon Nitride with technology from Kyocera™ for the best durability.
- Flat blade heating element for best heat dissipation.
- 3 year warranty.

### 41-801N

- Silicon Nitride technology for better durability.
- Rod shaped heating element for added strength.
- 2 year warranty.

**▲ ATTENTION:** Flame sensors are required for all Silicon Nitride Ignitors (41-802N and 41-801N). Ignitor/Sensor assembly 1751-729 (24" lead) or 1751-749 (72" lead) can be used if an existing flame sensor is not present and a terminal is available on the ignition control.

### 41-803

- High density Silicon Carbide for good physical strength and durability.
- Double helix spiral design for less current to light.
- 1 year warranty.

Robertshaw – *Simply the Right Choice™*

Use our three ignitors to replace over 130 competitor's ignitors including the Honeywell Glowfly™. For a complete replacement cross reference list, please see the chart on the back. Remember - any one of our ignitors can replace any one of the OEM part numbers listed.
