### MAXaire® Gold

#### Low air resistance electrostatic air filter

Today's high efficiency heat pumps and air conditioners require proper air flow. Without proper air flow, systems become inefficient, or in some cases may require major repairs. Consequently, electrostatic air filters must have arrestance to keep dust and other pollutants from accumulating on the coils and in the air. The MAXaire Gold electrostatic air filter has this special combination. It provides high arrestance at an industry leading 0.08" initial resistance.

- 81% Peak Arrestance
- 78% Average Arrestance
- .08 Initial Resistance at 1200 CFM
- 140 grams Dust Holding Capacity at .5 w.g.
- 170 grams Dust Holding Capacity at 1 w.g.
