Residential Heat Pumps

COMFORT

The latent capacity of an air conditioning system determines how well it can remove humidity from the air in your home. **Thermal Zone Systems are designed to have very high latent capacity.** With lower humidity levels inside, you can remain cool and comfortable, no matter what is happening outside.

Thermal Zone heat pumps use the latest technology and R410A refrigerant to achieve **much warmer heating temperatures** than many older systems.

Thermal Zone outdoor units are designed with a hot refrigerant **gas muffler, thermal expansion valve** and **unique grille**, which combine to make it **extremely quiet**. This is a feature that you and your neighbors will appreciate.

Smaller dimensions and a **neutral paint color** allow your Thermal Zone heat pump to blend in with your home's siding & landscaping.

AFFORDABLE

With **easy access panels** and **standardized parts**, you can be sure that servicing your Thermal Zone heat pump will be fast and simple, keeping maintenance costs down to a minimum.

Your new Thermal Zone heat pump has a **10 Year Limited Warranty on all Parts***, so that you can enjoy many years of worry free comfort.

RELIABLE

The **Legendary Copeland Scroll Compressor™**, which delivers proven durability and enhanced efficiencies, is at the heart of every Thermal Zone heat pump.

Factory installed thermal expansion valves (standard on both indoor & outdoor units) allow your Thermal Zone heat pump to continually adapt to conditions inside your home. As a result, you will be more comfortable, and the system does not work any harder than it needs to.

The heavy duty steel cabinet is rated to withstand a 500 hour salt spray test. The cabinet will protect your investment against damage from yard hazards & severe weather, so that it can operate at peak performance.

EFFICIENT

With efficiency ratings that range from **14 to 16 SEER**, Thermal Zone has the system that is perfect for you

Ozone Friendly R410A Refrigerant

Introduced in 1995, R410A is the most common refrigerant used for new HVAC equipment in North America today.

R410A has Zero Ozone Depletion Potential

R410A Models Available

Model	Rating with a high efficiency indoor unit		
	SEER	HPSF	COP
TZPL-4	14		Up to 4.00
TZPL-5	15	up to 8.5	Up to 3.88

Many systems meet or exceed Energy Star requirements. Ask your Thermal Zone dealer for help selecting the system that is right for you.

***10 Year Limited Parts Warranty** on all Thermal Zone R410A systems. Complete warranty details are available at www.ThermalZone.com or from your Thermal Zone dealer. Timely registration is required in most states.
