

SMART COMFORT. SMART LIVING.

T10 Pro Smart Thermostat with
RedLINK™ Room Sensor.

When it comes to indoor comfort, temperature is one of the biggest homeowner complaints. With the T10 Pro Smart Thermostat and RedLINK™ Room Sensors, you can prioritize comfort in different rooms at different times – like living areas during the day and in bedrooms at night. So everyone's comfortable when it counts.

Welcome to **JUST RIGHT**

The T10 Pro Smart Thermostat with RedLINK™ Room Sensor helps prioritize the temperature of multiple rooms, creating a more comfortable home for you and your family. With a sensor in the rooms that matter most, like the kitchen, living room and bedrooms, you can experience truly smart comfort control.

Prioritize multiple rooms at once.

Define a desired temperature and select specific rooms you want to prioritize or choose to prioritize based on motion in active rooms.*

Schedule your comfort, your way.

Make your own schedule in the app or on the thermostat, or allow each sensor's motion-detection technology to shift priority automatically as you move around the house.

Comfort at home. Savings when away.

The geofencing feature in the Honeywell Home app allows the T10 Pro Smart Thermostat to know when you're coming and going to automatically optimize comfort and savings.

*Motion detection does not change programmed setpoints.

A day in the life of the T10 PRO SMART THERMOSTAT

 6:30am

The minute your family starts waking up, the T10 Pro Smart Thermostat begins to make the bedrooms more comfortable, helping everyone prepare for the day.

 8:00am

As everyone leaves their bedrooms and moves to the kitchen and living room, the RedLINK™ Room Sensors take notice and make sure comfort follows.

 2:00pm

While you go about your day, you can check on your home at any time using the Honeywell Home app. If your home gets too hot or too cold, you'll get an alert.

 5:30pm

With geofencing, the T10 Pro Smart Thermostat knows when you're headed home and can automatically make the home comfortable by the time you get there.

 10:00pm

As everyone settles in for the night, the T10 Pro Smart Thermostat shifts focus to the rooms you've prioritized for optimal comfort.

Look for the Honeywell Home app on your app store to create and edit schedules, prioritize rooms and see smart alerts throughout your day.

Seamless smart home integration

The T10 Pro Smart Thermostat also works with several smart home partners, including Amazon Alexa, Google Assistant and more – so you can manage home comfort using voice commands or from a single app.
