

Air Purifiers

Product Guide

Trusted Solutions for a Healthy Home®

A high performance filter for better indoor air and system protection

One-inch filters have been the standard on system installs for years but they cause a variety of equipment problems: frozen coils, low airflow, inefficient cooling and even flood-back of refrigerant into the compressor. HVAC contractors know that better filtration prevents these problems — homeowners don't.

When you use Aprilaire air purifiers and high-performance filters, you ensure that the HVAC systems you install will last a long time and require fewer unscheduled service trips to homes. This saves your customers money and saves you and your staff valuable time.

A dirty and frozen AC coil caused by a sub-par one-inch filter and an irregular filter replacement schedule.

A clean furnace blower protected for years by an Aprilaire air purifier.

AIR PURIFIER CABINETS

- + 5-year warranty on corrosion-resistant, heavy gauge steel cabinets
- + Load rated up to 400 lbs.
- + Well-suited for all applications, installation types and orientations: attics, basements, upflow, downflow, etc.
- + A wide variety of cabinet sizes including our 31" x 28" low-resistance model and 16" x 25" and 20" x 25" Easy Install models
- + UL listed

HIGH PERFORMANCE AIR FILTERS

- + Superior performance to 1" filters in terms of particulate removal, static pressure and system protection
- + Self-Seal® filter design minimizes air bypass
- + Collapsible filters for easy transportation, storage and reduced damage
- + Offer the right replacement filter for homeowner needs
 - Clean air
 - Healthy home
 - Allergy and asthma

Choose filters designed for HVAC performance

Aprilaire's air purifiers are designed for years of trouble free performance. Our filters fit securely in our cabinets with our Interlock Rail System, and our Self-Seal® technology assures no air bypass.

APRILAIRE FILTER LASTS 6 TO 12 MONTHS

259"

24"

3.4 Sq. Ft.

Over 14x
MORE FILTER AREA for
removing harmful particles

*Area of a 20" x 25" Model 216 filter

As the leader in IAQ and whole-home filtration, Aprilaire offers homeowners and installers peace-of-mind and assurance that all aspects of our filters come together to provide you with the best air purifier on the market today.

PURE FIT PROMISE

The Aprilaire Pure Fit Promise guarantees a filter that is not only made to fit flawlessly into an Aprilaire air purifier, but one that also provides purer, healthier air.

SELF-SEAL FILTER

Our Patented Self-Seal technology works like this: the excess filter on either side of the Interlock Rails collect at the back and front of the air purifier in order to create a seal that allows no air to pass by unfiltered.

INTERLOCK RAILS

The Aprilaire Interlock Rail System allows our high-performance air filter to work without unnecessary cardboard framing, or plastic or metal reinforcements. It also ensures that no air bypass occurs over or under the filter.

CLEAN-COIL GUARANTEE

Should a homeowner's indoor air conditioner coil require a professional cleaning at any time up to 10 years after being installed with an Aprilaire air purifier, we will pay \$100 toward that cleaning by an HVAC contractor.

Growing your business with Aprilaire

In addition to the system protection and improved indoor air quality that comes with adding an Aprilaire air purifier on every job, **annual filter replacement with system check-ups and service agreements** earn you additional revenue. The addition of MERV 16 Allergy & Asthma and Odor Reduction filters to our lineup gives you even more replacement filter options to offer your customers.

APRILAIRE FILTER PROFITS ON AN ANNUAL AND FIVE-YEAR CUMULATIVE BASIS

Assuming one filter per year with a profit of \$20 per filter

YEARLY PROFIT
CUMULATIVE PROFIT

Aprilaire offers upgrade rail kits that fit into our older Aprilaire and Space-Gard cabinets (Models 2200 and 2400). We also offer competitive upgrade rails that fit into a variety of air cleaners made by other manufacturers. Both types of rails allow you to use the same high-performance filters that fit into the air purifiers we offer today. This means you can earn even more revenue from Aprilaire replacement filters on every air purifier you've installed—past, present and future.

If you're serious about the need for putting an Aprilaire air purifier on every job, we can help keep your name on top of your customers' minds by **imprinting our air purifier doors with your logo and contact information**. Every time your customers need a new filter, they'll know exactly who to contact. Contact your District Sales Manager for more information.

The right filter for every home

- + MERV 16 performance
- + Low resistance
- + Removes up to 99% of allergy & asthma triggers
- + Superior system protection
- + Up to 6-month filter life

- + MERV 13 performance plus odor reduction
- + The most activated carbon added to any air filter
- + Reduces noticeable odors caused by pets, cooking and common household VOCs
- + Up to 6-month filter life

- + MERV 13 performance
- + Designed for homeowners with low-to-moderate allergy problems
- + Low resistance
- + Up to 1-year filter life

- + MERV 11 performance
- + Particulate removal, system protection and static pressure superior to 1" filters
- + Vacuum and dust less often
- + Up to 1-year filter life

Features and benefits

2000 Series with Allergy & Asthma MERV 16 filters

- + Offers the best performance in terms of particulate removal, system protection and relief for allergy and asthma sufferers
- + Model 2516 air purifier offers the lowest resistance with a MERV 16 filter in the industry designed for higher tonnage systems
- + Also compatible with our Odor Reduction, MERV 13 and MERV 11 filters
- + Minimal maintenance required – simply replace filters once every 6 months or more
- + 216 and 416 filters not recommended for use with 5-ton systems
- + Made of corrosion-resistant heavy-gauge pre-painted steel

2000 Series with Healthy Home MERV 13 filters

- + Also compatible with MERV 16, Odor Reduction, or MERV 11 filters
- + Minimal maintenance required — simply replace filter annually
- + Made of corrosion-resistant heavy-gauge pre-painted steel
- + Low resistance

1000 Series with Clean Air MERV 11 filters

- + Can be upgraded to MERV 16, Odor Reduction, or MERV 13 filter with simple filter change
- + Minimal maintenance required — simply replace filter annually
- + Model 1510 is designed for low static pressure on higher tonnage residential HVAC installations including geothermal systems, eliminating the need for multiple air purifiers on one system
- + Made of corrosion-resistant heavy-gauge galvanized steel

3000 Series air purifiers include our model 8476 thermostat with Event-Based™ Air Purification, which gives homeowners on-demand control.

Our Wi-Fi thermostats and mobile device apps are designed to give homeowners complete control over their installed Aprilaire products and improve the quality of their home's indoor air. The Event-Based™ Air Purifying feature on both the thermostat and app turns on the HVAC fan for a period of time so the air purifier can remove dust and particles after vacuuming, for example. The feature can be selected for longer periods of time to provide relief for allergy sufferers in the home as well. Whatever the problem, Aprilaire's Event-Based™ Air Purifying is the solution.

Inlet Return Duct Connection (Top View)

Front

Outlet Side Furnace Connection

The Models 1610 and 1620 are designed for easy installation in upflow HVAC systems with right or left returns. They feature built-in ductwork for applications that require a 90° duct adapter and an 8-10" adjustable return opening.

FEATURES

- + Ships with MERV 11 filter
- + Can be upgraded to MERV 16, Odor Reduction, or MERV 13 filter with simple filter change
- + Easily converts to right or left side by reversing door and back plate
- + Includes metal tabs for securing the air purifier frame to the furnace or air handler
- + Simple annual filter replacement
- + Made of corrosion-resistant heavy gauge pre-painted steel
- + Proprietary door design and Self-Seal® design virtually eliminates air bypass for optimal performance
- + UL classified filters
- + Five-year warranty on cabinet from date of installation

BENEFITS

- + Reduces installation time — no need for field-formed transitions — requires little or no cold air return repositioning
- + Protects HVAC equipment from dust buildup
- + Protects equipment performance
- + Superior performance over one-inch panel filters and four-inch cartridge filters

5000 ELECTRONIC AIR PURIFIER

MODEL 5000 SPECIFICATIONS AND SIZING SUMMARY

Nominal Size	Shipping Weight	Replacement Filter	Filtering Filter Area
16" x 25"	38 lbs.	Model 501	72.3 ft ²

Inlet Side Return Duct Connection

Front

Outlet Side Furnace Connection

Dimension	Description	Model 5000
A	Inlet Opening Height	15½" (394mm)
B	Outer Housing Depth without Door & Clips	28⅞" (714mm)
C	Inlet Opening Width	23⅞" (606mm)
D	Unit Width	12" (305mm)
E	Outer Housing Depth with Door & Clips	31" (787mm)
F	Outlet Opening Width	24⅞" (625mm)
G	Outlet Opening Height	15½" (394mm)
H	Unit Height at Back	17¼" (451mm)
I	Unit Height at Front	18⅞" (467mm)

The Model 5000 greatly minimizes airborne contaminants that can aggravate allergies as well as asthma, cold and flu symptoms. Captures 89% of particles 0.3-1.0 micron in size and 98% of particles 3.0-10.0 microns in size.

Comes with Model 8476 Universal Programmable (4H/2C) Thermostat with Event-Based™ Air Purification

FEATURES

- + Silent operation — none of the “snapping” or “popping” that’s common with plate-type EAPs
- + Minimal maintenance required — simply replace filter annually and wipe off internal components
- + Made of corrosion-resistant heavy gauge galvanized steel
- + UL listed cabinet
- + UL classified filters
- + Load rated up to 400 lbs.
- + Five-year warranty on cabinet from date of installation
- + Unit is equipped with six ft. grounded cord with plug
- + Consumes less than 50 watts with high voltage active

BENEFITS

- + Captures 89% of particles 0.3-1.0 micron in size and 98% of particles 3.0-10.0 microns in size
- + Offers equipment protection from dust buildup
- + Protects equipment performance
- + Filter revenue — HVAC channel only
- + Superior performance over one-inch panel filters and four-inch cartridge filters

ELECTRICAL SPECIFICATIONS

Voltage	120 VAC ± 15%
Frequency	60Hz
Current	0.3 A

Application guidance

Aprilaire's award-winning lineup of air purifiers are configured based upon the many different air handler cabinet sizes. No matter if it's a downflow, upflow, horizontal, two-, three- or five-ton system, Aprilaire has the size to make installation easy.

It's all about airflow

Equipment cabinet sizes are getting smaller. Use the smaller size cabinet as an opportunity to increase airflow and ensure the best system protection by installing a Model 2516 cabinet with MERV 16 filter. The lower static pressure and higher removal efficiency will optimize the HVAC system for years to come.

Application guidance

Contractors have done the math. Using the Model 1610/1620 with its integrated transition is a cost effective solution. There is no need to purchase a separate transition.

► BENEFITS

- + Minimizes distance from the air handler for tight install (water heater)
- + Perfect when return is close to air handler, when replacing 1" or 2" panel filter slots
- + Converts easily to right or left side
- + Unique air inlet tab adjusts to multiple duct sizes

High tonnage and geothermal systems

The system pressures of these applications require very low resistance. Historically, contractors stack air purifiers. The Aprilaire Models 2516 and 1510 are specifically designed for these applications.
