

CONDENSING UNIT COVERS

Brinmar manufactures winter covers that are available in hundreds of different shapes and sizes - each designed to fit a specific condensing unit. The result is an attractive vinyl cover with a glove-like fit.

Brinmar covers are made of a heavy-duty vinyl with a durable cloth backing that resists ripping and tearing. This long lasting material is also specially treated to be mildew and UV resistant. Brinmar covers are available in a neutral gray or beige color and they're secured with a convenient hook-and-loop strap sewn around a precision cutout for the unit's electrical and refrigeration lines. More homeowners appreciate Brinmar winter covers for their superior appearance and their rugged construction.

Bottom-vented air conditioner covers are by far our most popular style. Covers are ½" to 2 inches short to provide airflow from the bottom of the unit and the refrigeration opening.

Our **premium vented covers** have two plastic air vents that provide maximum cross ventilation. Incoming air is deflected throughout the entire condensing unit. Add an 'X' to our part numbers when ordering.

- Premium 18 ounce vinyl with a reinforced cloth backing. Gray or beige color to match cabinet.
- Tailored to fit the exact shape of unit – over 12,000 condensing unit models on file.
- Precision opening to fit electrical and refrigeration lines with convenient hook-and-loop closure.
- Material is specially treated against mildew, fungus, UV and sub-zero temperatures.
- Lifetime limited warranty.

Brinmar manufactures the highest quality winter covers available. We stock hundreds of cover models for over 12,000 different condensing units. As a market leader we provide unmatched quality, price and service. Our premium covers and other Brinmar HVAC products are available from leading suppliers throughout North America.
