FEATURES & BENEFITS

Pre-insulated Funnel Entry Vinyl Terminal

Vinyl insulation provides good dielectric strength.

Insulation has locating ridge for positioning crimping tool and supporting wire insulation.

Funnel design guides wire into crimping position without wire strand hangup.

Multiple "V" grooves inside barrel provide firm grip on wire strands and current flow when crimped.

Electro tin plating stops corrosion, pitting and oxidation.

Terminal area constructed of annealed, electrolytic (ETP) copper insures maximum electrical conductivity.
