

## EZ-In Shielded Mini-Split Cable

EZ-In is designed to simplify the installation of all mini-splits. Its protective outer coating makes it the only cable designed for both inside and outside use thus eliminating the need for conduit or cable trays. EZ-In cable is stranded and contains an aluminum foil shield to further enhance the high frequency communication of today's mini-splits.

### Construction:

- Shielded & stranded copper conductors
- Interlocked aluminum armor
- PVC jacket

### Applications:

- 600V
- Indoor/outdoor/direct burial
- Conduit not required

### Specifications:

- NEC NFPA 70
- ASTM B3, B787
- UL 1569 for Type MC
