

EzySlide® Dampers

**Wireless, Motorless,
Insertable Dampers**

EzySlide™ Dampers are powered by low-pressure air, supplied by the industrial mini-pump contained inside the Arzel® Zone Control Panel. Air power gives the damper incredible **flexibility and reliability**. You can use as many dampers as you need on any zone.

- ◆ Round EzySlide™ Dampers are stocked in sizes from 4 to 16 inches
- ◆ Rectangular EzySlide™ Dampers are stocked in sizes from 2 to 40 inches wide and 20 inches tall
- ◆ Custom sizes available upon request

Simple Installation

EzySlide™ Dampers eliminate the need to take down or redesign the existing ductwork. Simply, cut a slot in the duct, insert the damper, and fasten it to the duct.

RegiDamper®

Zone the Unzonable

The RegiDamper™ allows for easy damper installation in previously difficult situations. Using plenum rated tubing the airline is fished back through the ductwork and the damper slips easily into your register boot.

Instead of the standard Arzel® actuator, the RegiDamper™ features a patented low-friction cylinder to provide motive force. The RegiDamper™ works with standard Arzel® EzySlide™ Dampers, so you can mix and match damper types.

Stocked RegiDamper™ sizes are:

2"x10"	2"x12"
4"x10"	4"x12"
6"x10"	6"x12"

Custom sizes available upon request

- ◆ Finished basements
- ◆ Enclosed ductwork
- ◆ Houses on a slab
- ◆ Soffit duct systems
- ◆ Anyplace there is limited access to the ductwork
