THE ADVANTAGES OF BIG FOOT SYSTEMS

The industry standard. Big Foot Systems set the industry standard for free standing, non-penetrative equipment frames for air conditioning, refrigeration, and other associated roof top equipment.

Rugged stance. There are no limits to what can be supported with a Big Foot System. Mounting is strong, secure, flexible and leak proof. Installation is quick, clean, practical and aesthetically pleasing.

Modular flexibility. The system is modular and completely flexible. Custom designs offer the ability to change any part of the design of the frame at any time to manage roof loads within project specific parameters.

Removable legs. Big Foot system legs can be removed individually. Costly removal of equipment is unnecessary when re-roofing or resurfacing.

Optimum weight distribution. The Big Foot base is designed to place load evenly across the frames footprint.

Optimum strength and longevity. The Big Foot base is made of glass filled Nylon with UV protection. Frameworks are hot dip galvanized for all weather protection and tested to ASTM (Salt Mist) B117 and G85 (Acetic Salt Mist) standards.

Quiet durability. An anti-vibration mat is bonded to the nylon base.

Quick on-site leveling. The legs allow for vertical height adjustment to permit easy leveling. An extended leg set option is available for stepped roof applications.

Reduced risk of roof leaks. The Big Foot System does not penetrate the waterproof membrane, eliminating difficult flashing around concrete structures. The roofing system warranty is never compromised.

Architecturally friendly. Big Foot clean contemporary framework suspends roofing equipment above the roof surface, allowing for a simpler, more flexible roof design.

Custom frameworks. For larger, more complex projects, Big Foot offers a custom frame design service. With a plan of your roof and dimensions/weights of the equipment, we can specify standard Big Foot system framework to support up to 10 tons. BIG FOOT® FAST FIX STAND RANGE

Simple, strong and sturdy ground mount support system.

Mini-split & VRF/VRV condenser stands

The **Fast Fix Stand Range** is a versatile ground mount support system split into two ranges, mini-splits and VRF/VRV condensing units. Available in a variety of sizes, with optional Extender Kits for both height and length, the Stand Range is designed to support units both individually and in multiples.

With adjustability of cross bar positions, anti-vibration mounts for mini-splits and clamp kits for the VRF/VRV units, these frames can support a wide variety of units, are cost-effective and quick to assemble.

- Rugged ASTM-A36 galvanized steel corrosion resistant support
- Tested to ASTM (Salt Mist) B117 and G85 (Acetic Salt Mist) standards
- More corrosion resistant than competitor stands
- Pre-boxed – quick assembly
- Base extensions allow unlimited mounting possibilities
- Compatible with all leading mini-split condensing units

Available in a variety of sizes with extender kits.
