

QwikSEER+ WattSaverTM

...the Affordable Solution
for Energy Savings and Humidity Control

QwikSEER+ WattSaver™

Enhance your system's efficiency at a fraction of the cost

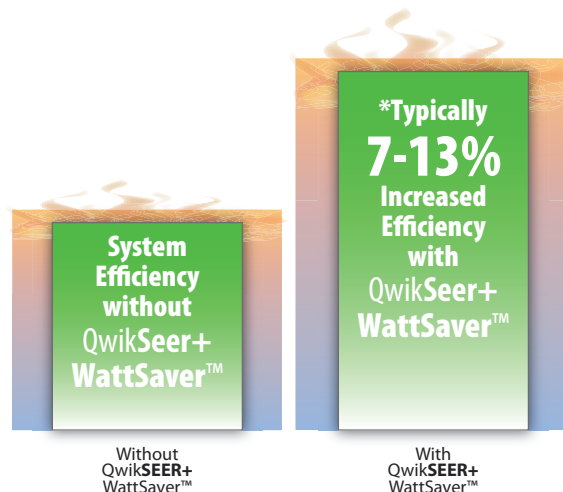

Designed to work with your present air conditioning or heat pump system, QwikSEER+ WattSaver™ has been demonstrated to provide **EER improvements of 7-13%*** along with **improved humidity removal**.

- ✓ Saves money
- ✓ Uses less energy
- ✓ Increases comfort
- ✓ Improves humidity removal

QwikSEER+ WattSaver's™ plug & play design is fully compatible with your existing system. No need to change or purchase additional components. QwikSEER+ WattSaver™ **handles everything automatically!**

Here's How...

14 SEER UNIT EFFICIENCY TEST RESULTS

QwikSEER+ WattSaver™ is a revolutionary electronic control that works with existing system hardware to automatically adjust the airflow of your air conditioner or heat pump to maximize performance, increase humidity removal, and save energy.

*Independent Laboratory Testing at Intertek (Plano, Texas) following ANSI/ASHRAE 37 test protocol and using a residential 14 SEER air handler and condensing unit (80°F indoor, 97°F outdoor temperatures) resulted in an EER improvement of 7.4%. Using the same condensing unit and temperature conditions with a residential furnace unit resulted in an EER improvement of 10.5%. On cooler days, (82°F outdoor temperature) the EER improvements for air conditioning and furnace units increased to 10.9% and 12.9% respectively. For complete test results, go to www.qwik.com.

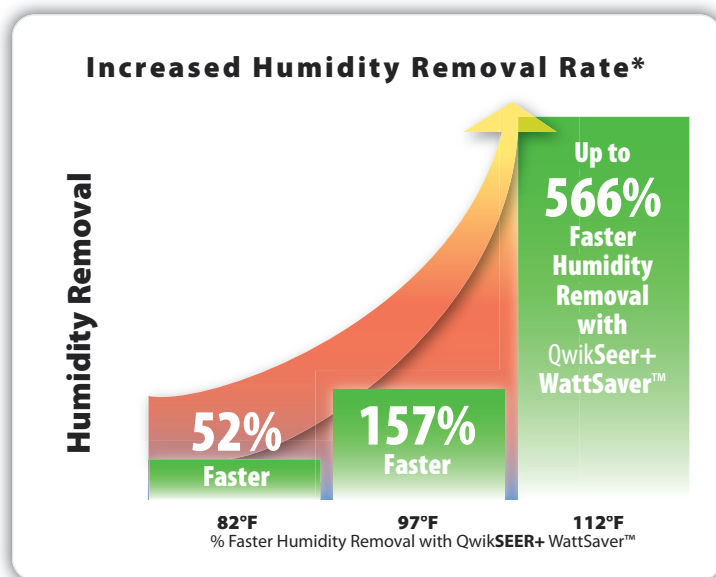

Increase Humidity Removal Rate up to 566%

Indoor air quality (IAQ) is a vital factor in maintaining a healthy life. By reducing the humidity in a home, mold growth is avoided.

According to the EPA (<http://www.epa.gov/mold/preventionandcontrol.html>), to prevent mold, relative humidity should be maintained below 60%.

QwikSEER+ WattSaver™ has been shown to improve humidity removal rates by up to 566%. This increased moisture removal can significantly improve indoor comfort while also inhibiting the formation of mold, thus improving IAQ.

QwikSEER+ WattSaver's™ optional humidity control is engineered to optimize the system for fastest humidity removal during high-humidity situations.

*Based on Independent Laboratory Testing at Intertek (Plano, Texas) of a 14 SEER system.

For complete test results, go to www.qwik.com.

Additional Benefits

- ▶ **Added Blower Motor Protection:** QwikSEER+ WattSaver's™ patented design incorporates high-voltage electrical protection from voltage spikes often created by severe thunderstorms. This feature could eliminate the need for motor service or replacement.
- ▶ **1 Year Limited Warranty:** Mainstream Engineering Corporation warrants this product against failure due to defect or workmanship under normal use and maintenance.

QwikSEER+ WattSaver™

- ▶ Easily Adaptable
- ▶ Automatic Operation
- ▶ Proven Performance
- ▶ U.S. Patents Pending

**Compatible
with most
residential
A/C & heat
pump systems**
