## 1-17. AIR CLEANING FILTER

### Every 3 months:

- Remove dirt by a vacuum cleaner.

### When dirt cannot be removed by vacuum cleaning:

- Soak the filter and its frame in lukewarm water before rinsing it.
- After washing, dry it well in shade.

### Every year:

- Replace it with a new air cleaning filter for best performance.

**NOTE 1:** Clean the filters regularly for best performance and to reduce power consumption.

**NOTE 2:** Dirty filters cause condensation in the air conditioner which will contribute to the growth of fungi such as mold.  
It is therefore recommended to clean air filters every 2 weeks.
