¹ A branch box can only have a maximum of 3 PEAD units. If 3 PEAD units are connected to the 1 branch box, then additional units cannot be connected to the same branch box

² A branch box can only have a maximum of 2 PEAD units. When connecting any number of PEAD units, the total connected capacity should not exceed 100%

³ Please refer to Application Note 1039 for more information and exceptions to these rules

¹ A maximum of 2 PAA units can be connected

² When connecting any number of PAA units, the total connected capacity must not exceed 100%

³ When any number of PAA units are connected, the maximum number of allowable connected indoor units decreases to 3

⁴ When any number of PAA units are connected, the maximum number of allowable connected indoor units decreases to 4

⁵ When any number of PAA units are connected, the maximum number of allowable connected indoor units decreases to 6

⁶ The maximum total piping length depends on the number of PAA indoor units available (refer to the PAA installation manual for further detail)

⁷ If only PAA units are connected with no other indoor unit type connected to the system, there must be a minimum total piping length of 33 Ft. from the outdoor unit to each of the PAA units
