Comfort Control at Your Fingertips

Innovation and the Environment

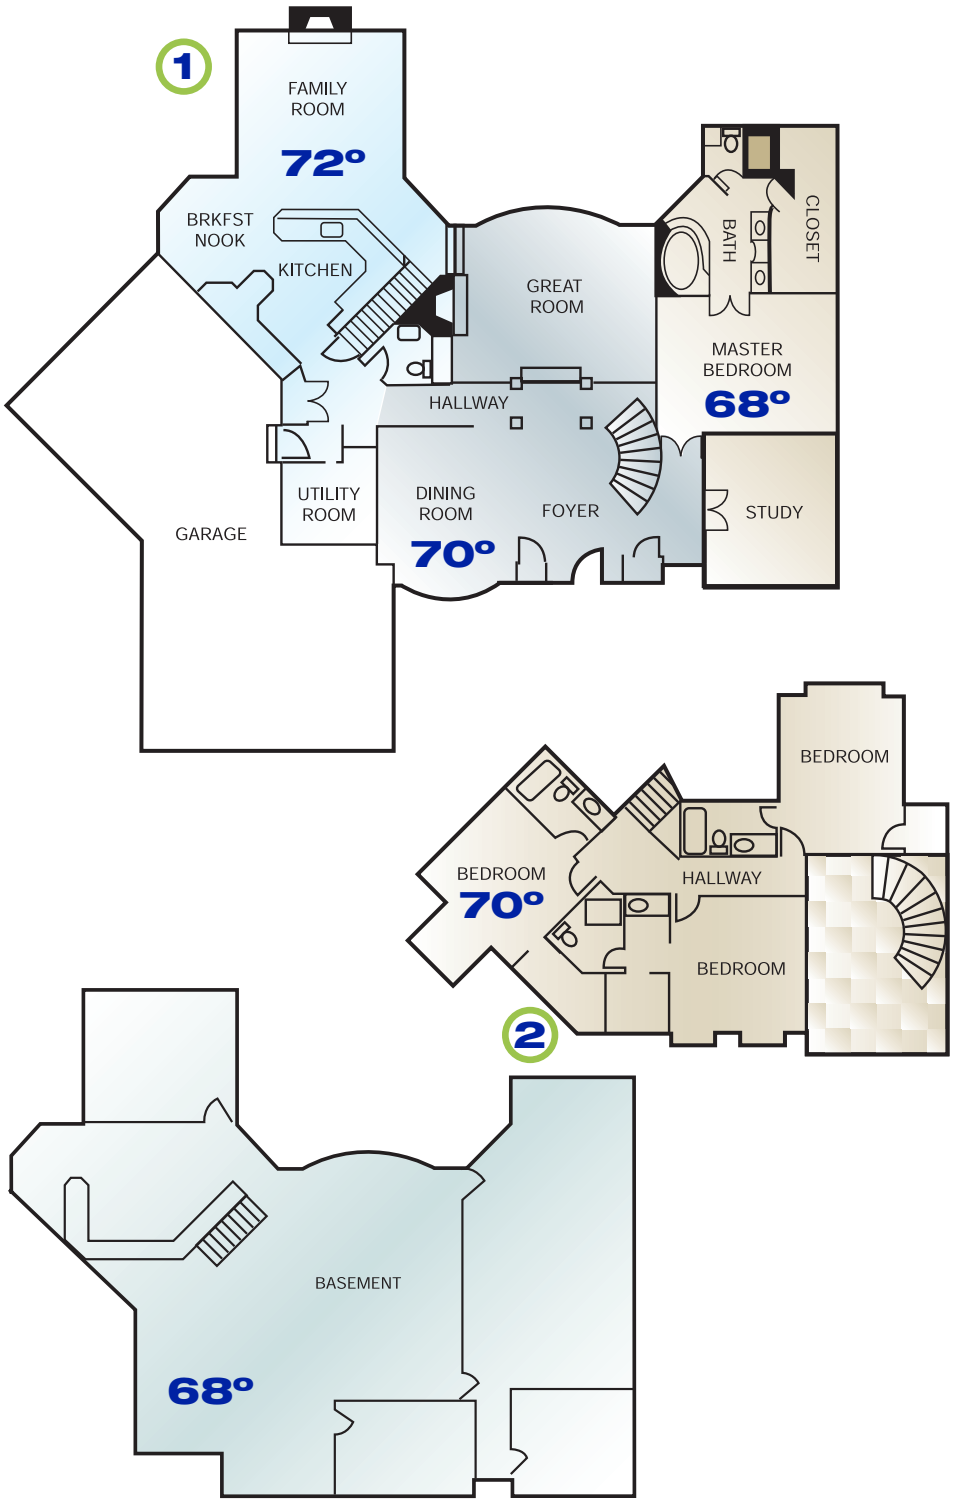

Over 100 years ago, a humble but determined engineer solved one of mankind's most elusive challenges by controlling the indoor environment. A leading engineer of his day, Dr. Willis Carrier would file more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

Carrier's foresight changed the world forever and paved the way for over a century of once-impossible innovations. Yet in addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

Carrier helps you improve your world with the Performance™ series ComfortZone™ II zoning system that delivers the potential for up to eight zones of customized comfort and energy management within your home.

Leaders in Technology

IdealHumidity™

All year long, humidity affects the temperature at which you feel most comfortable. When you combine the Performance series ComfortZone II zoning system, Carrier humidifier, variable-speed furnace or fan coil and a compatible Carrier air conditioner or heat pump, Ideal Humidity System technology gives you enhanced control over humidity levels for greater comfort even when your system isn't calling for heating or cooling.† You'll feel cooler at higher temperatures in the summer and warmer at lower temperatures in the winter.

†Ideal Humidity System technology continually monitors indoor humidity, indoor temperature and outdoor temperature, and has the ability to turn on your comfort system just for dehumidification in the cooling season.

1 Customized Comfort

With separate control of up to eight zones, you can reduce hot and cold spots for even, consistent comfort throughout your home. Maximum efficiency is achieved by delivering comfort precisely where and when you need it so you aren't spending money heating or cooling unused rooms.

2 Flexible, Seven-Day Programmability

Maximize comfort and energy savings with the ability to set a different comfort schedule in each zone for every day of the week.

3 Convenience and Control

A smart sensor or remote room sensor in each zone monitors individual zone temperatures and allows you to adjust the temperature setting for that zone.

4 Precision Comfort Schedule

Smart Recovery™ function makes sure each zone reaches its selected temperature at its scheduled time by starting your system in advance, ensuring your comfort is right on time.

It's About Your Comfort

Most homes have differing comfort needs in different areas. A baby's room needs to be warm and cozy, the basement needs to be cool and dry, and the kitchen can be adjusted at any time. However, standard comfort systems have just one thermostat with the ability to set one temperature for the entire house. It's like having one light switch to control all of the lighting inside!

Zoning provides customized comfort control, keeping the most commonly used areas of a home comfortable by delivering conditioned air to those areas during the times you select. Zoning can also offer energy saving benefits by delivering comfort only to the areas of the home when you need it.

10 YEAR LIMITED WARRANTY

Limited Warranty

To the original owner, the Carrier® Performance™ series ComfortZone™ II zoning system is covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty periods. See warranty certificate at carrier.com for complete details and restrictions. Be sure to ask your Carrier dealer about optional labor warranties.

Carrier® Systems for Unmatched Performance in Every Season

Willis Carrier's meticulous attention to quality and detail led to a major culture shift in the way we live indoors. More than a century later, Carrier Corporation operates with a unique willingness to develop new technology, the confidence to revise proven designs and the ability to deliver results with every new installation.

Part of that equation is our nationwide network of experts you can turn to for all of your indoor comfort needs. Your local Carrier dealer is well equipped to evaluate your home – everything from size, window placement, ductwork, venting and other structural specifics – and create a customized system designed around your lifestyle. So when it's time to make a choice for your family's comfort, make the best decision you'll ever make – Carrier – and let the experts do the rest.

The Total Indoor Comfort System

Air Conditioner provides reliable, high-efficiency cooling for long-lasting comfort and energy savings.

Gas Furnace provides reliable, high-efficiency heating for long-lasting comfort and energy savings.

Evaporator Coil is matched with the proper outdoor unit to provide top heating and cooling efficiency and years of reliable service.

Air Cleaner improves air quality by removing harmful and irritating airborne pollutants in your home.

Ventilator combines fresh outdoor air with conditioned indoor air for improved air quality and maximum efficiency – great for today's tightly constructed home.

Humidifier replenishes moisture to dry air.

Zoning sets different temperatures for up to eight different areas of your home for truly customized comfort and enhanced utility savings.

UV Lamp inhibits the growth of contaminants on the indoor coil, leaving your home with cleaner, fresher indoor air.

Edge® Programmable Thermostat allows precise temperature and humidity control along with programmable features to further customize your comfort.
