

Wireless Lodge Watch

Stop Wasting Money on Energy Costs!

The Lodge Watch is a wireless monitoring system designed to make sure your air conditioner or furnace isn't running needlessly because a door or window has been left open. The Lodge Watch detects when a door or window is left open for more than 2 minutes and then shuts off the HVAC equipment until it detects the closure of the door or window.

Save on cooling & heating costs in homes and condos!

- Perfect for homes, condos, vacation homes & rentals
- No unsightly wires!
- Monitors up to 30 doors/windows in one building
- Sensors are solar powered- no need to change batteries
- Reduces energy consumption
