

MICROPURE

TOTAL HOME ACTIVE AIR PURIFIER

FEATURES:

- ALL NEW MX4™ Ionic Oxidation eliminates pollutants in the air *and* on surfaces.
- Eliminates bacteria, mold, viruses, mildew, smoke, odors, VOC's, and more.
- Unique air purification process even cleans air that doesn't pass through the HVAC system.
- Installs in any HVAC system.
- Long life warranty. 5-yr power supply, 4-yr MX4™ core, 2-yr UV lamp.

ABOUT DUST FREE®

Dust Free® is the name recognized worldwide for manufacturing quality and expertise. As the manufacturer of IAQ products for residential, commercial, and industrial application, Dust Free® makes a wide variety of innovative products for the removal and control of indoor airborne contaminants.

Visit www.dustfree.com for the latest product information and new product releases.

TAKE THE SOLUTION TO THE PROBLEM.

POWERED BY
MX4™
IONIC OXIDATION

Revolutionary, patents pending, air cleaning technology.

Amazingly fresh air.

THE MICROPURE®
ACTIVELY CLEANS
AIR LIKE NOTHING
ELSE CAN.

BREATHE BETTER.

The MicroPure® Total Home Active Air Purifier uses a unique new indoor air quality process to naturally produce airborne scrubbers that actively seek out and destroy indoor pollutants in the air, on surfaces, and wherever the air goes.

- Proven effective in the air AND on surfaces!
- Unique total home air cleaning solution.
- Conglomerates sub-micron airborne particulates.
- Independent laboratory tested technology.

NASA Technology.
Developed for the International Space Station, MX4™ technology produces positively and negatively charged air scrubbers that attract contaminants like a magnet. And eliminates them!

POWERED BY
MX4™
IONIC OXIDATION

MX4™ Ionic Oxidation utilizes propriety metallic technology and UV light energy to naturally produce ionic air scrubbers and destroy many indoor pollutants, such as bacteria, viruses, mold, VOC's, mildew, allergens, and odors.

**WORKS 24/7 IN EVERY ROOM
THROUGHOUT THE HOME.**

Unique new MX4™ Ionic Oxidation technology, produces an active cloud of air scrubbers that sweep through the home and seek out indoor contaminants. **Pollutants are safely and effectively destroyed even when they have not passed directly through the HVAC system!**

**UNMATCHED AIR PURIFICATION.
AND CLEANS SURFACES TOO.**

Most indoor air purification systems are effective in reducing airborne contaminants. The MicroPure® Total Home Active Air Purifier takes the next step in whole house air purification and is **proven effective in reducing contaminants on surfaces as well.**

*Visit <http://www.dustfree.com/micropure> for lab results.

**ELIMINATES CONTAMINANTS
WHEREVER THEY HIDE.**

Charged MicroPure® ionic air scrubbers attract pollutants like a magnet. Even in areas of your home that have reduced air flow, air scrubbers are still able to seek out and eliminate contaminants. **This active approach is what makes the MicroPure® system so effective.**

**SAFELY AND EFFECTIVELY
REMOVES SMOKE AND ODORS.**

Smoke, VOC's, and odors are some of the toughest indoor pollutants to remove. The special oxidizing powers of the ionic air scrubbers break down these contaminants at their molecular level, throughout the entire home.
